

WATERING FACILITY

Design Survey, Design Data and Drawings and Specifications

The following information shall be obtained and recorded in the field notes. Standard plans and specifications shall be provided:

- a. Capacity requirements.
- b. Location and drain installation.
- c. Location Map (cover sheet of field notes).

Compliance Checks

All compliance checks shall be recorded in the field notes. Compliance checks shall include, but will not be limited to, the following:

- a. Dimensions and materials of tank.
- b. Adequacy of drain and other appurtenances.
- c. Statement of compliance.

As-Built Plans

As-Built plans are not required unless there was a significant change in materials or design. If there were significant changes, they will be so noted on a standard plan and the plan will be marked "As-Built".
